

## Environmental policy

### Environmental Policy Statement

As a company we are very aware of the impact that our business activities are having on the environment. We believe it is an inheritance that should not only be preserved but also improved.

We are committed to finding ways to improve our management of waste products as well as natural resources that we use in the course of our activities.

- We will recycle waste materials whenever we can.
- We will make economic use of natural resources.
- We will dispose of waste in a responsible way, always conforming to current legislation.
- We will train our staff to be aware of steps that can be taken to preserve raw materials and energy resources and comply with our objectives.

All employees and sub-contractors are expected to co-operate and assist in the implementation of this policy, whilst ensuring that their own works, so far as is reasonably practicable, are carried out without risk to themselves, others or the environment. This includes co-operating with management on any environment related matter.

We will take all practical steps to ensure that potential hazards and risks to the environment are identified and that suitable and effective prevent and control measures are implemented. All employees will be provided with the necessary resources, equipment, information, instruction and training to fulfill the requirements of this policy.

Our immediate target is to conform our environmental management system to the ISO 14001 standard and thus have in place a recognised programme of planned and continual improvement with legal compliance to address environmental issues.

**Mark Went**  
Director February 2011
