Seating, water features & planters

Aqua Corona pond water feature installation, Jersey. Designed with a flat top, the water feature is also a seating area.

Aqua Corona Circular Water Feature

Simple curves add beauty and fluidity to exteriors, interior meeting areas, showrooms, foyers and lobbies.

Our curvaceous 4m diameter circular pond and water features create calming centrepieces in a range of environments.

If you're looking to add a splash of colour we can manufacture in any BS/RAL colour to match any colour scheme or corporate interior.

The Aqua Corona water feature is easy to install as it's lightweight and modular in construction.

Installation service available.

Trade discounts available.

SGF103 4m circular water feature

Top: Aqua Corona water feature installation at a Thames-side home. The contemporary water feature was specified to sit alongside an outdoor modern art collection.

Right: Corona creates a 'C-shaped' seating option for large garden spaces and a full Corona, ideal to frame trees and other garden features.

The GeoMet Range

GeoMet is a stunning collection of geometrically-shaped modular furniture pieces ideal for urban environs, recreational spaces and large-scale commercial interiors.

The range has been designed for mix and match use or pieces can be used standalone.

Each piece in the GeoMet collection is handmade by highly skilled craftspeople based in the UK. The entire range is composite moulded which is the perfect outdoor furniture material as it's weatherproof, lasts a lifetime and requires minimum maintenance.

At Sui Generis we can create pieces in any colour, shape or size.

Also available: Corona creates a 'C-shaped' seating design for large contemporary garden spaces and a complete ring-shape ideal as a seat or frame for trees and other outdoor features.
