SUI GENERIS OFFERS STRIKING NEW GARDEN FURNITURE DESIGNS FOR GARDEN CENTRES

Leading fibreglass mouldings company, Sui Generis, is offering garden centres a striking yet contemporary top-of-the-range collection of garden furniture and water features.

Sui Generis has launched 'GeoMet' an alternative to the traditional timber, aluminium, PVE and plastic ranges of garden furniture. GeoMet is a range of colourful fibreglass seating, tables and water features ideal for the gardener looking to create ultimate impact with the minimum of maintenance.

Serpentine Modular Seating

Halo Modular Seating

GeoMet includes a range of seating choices from 'Serpentine' and 'Halo' curved modular seating designs, which are easy to install and can be adapted to fit any size of space, to 'Cube', a simple box-shape perfect to use as a stool or basic table.

Cube Seats or Tables

The GeoMet collection also includes a range of water features and planters to complement Sui Generis' seating options. Pictured below are Aqua Corona and the Aqua Corona Semi-Circular water features.

Aqua Corona Water Feature

Aqua Corona - Semi Circular Water Feature

Sui Generis also offers Corona to create a 'C-shaped' seating option for large contemporary garden spaces and a full Corona which is ideal to frame trees and other garden features.

Corona Seating

To complement the GeoMet range of garden furniture Sui Generis also offers a stylish range of modern planters in very practical cube or halo designs.

Cube Planters

Mark Went, Managing Director, Sui Generis, is excited about the launch. He says: "Fibreglass is the perfect material to create garden furniture. We can create pieces in any colour, shape or size that will withstand the natural elements, last a lifetime and require minimum maintenance. We can offer garden centres a unique product to offer their more discerning customers."

Halo Planters

All products in the GeoMet range are made from 100 per cent fibreglass and benefit from an indefinite lifespan, are highly durable, easy-to-clean, weatherproof and virtually maintenance-free. All items can be made in any BS/RAL colour to match any interior or corporate colour. Many items in the range are modular construction, which enables easy installation and can be adapted to create a variety of sizes and styles.
