We can install and beautifully finish your stairs and floors with an anti-slip walking surface, keeping you safe.

For customers installing at home, DIY and smaller projects, we offer quick and easy How To Install PDF guides for maintenance, cleaning and installation.

Commercial, industrial and public projects

For business customers and larger projects we recommend our fitting service.

Our teams of fully qualified installers have over 20 years experience and have managed a range of installations from our Anti-Slip Stair and Floor product range, GRP Grating to Industrial Lining and Coatings installations throughout the UK.

The ideal solution for companies that do not have the time, staff available or a facilities management team free to carry out the installation required.

We'll do the hard work for you!

Benefits

- We'll take measurements, plan your project and organise cutting of materials.
- Install to a high standard finish.
- Our teams are fully experienced at fitting to stairs, floors, ramps and platform areas.
- Fully insured and certificated personnel.
- For all substrates.
- Quick installation time
- Over 20 years experience.

How does the installation service work?

- After receiving a brief, our estimator will visit and undertake a free site survey.
- This includes accurate measuring of the site to ensure exact cutting of materials and to avoid wastage.
- Risk assessments and method statements will be supplied before any commencement of work is carried out for your approval, with a recommendation of products most suitable, with your quotation.
- We'll discuss the entire installation procedure and arrange the most convenient time for your installation.
